

## Automation engineer

We are looking for pragmatic engineers to be part of our international team. We develop state of the art equipment and solutions for automation of transport and storage systems. Together with our other offices in the Netherlands we come to the best solution for every unique warehouse!

### Requirements

- **Required years of experience**  
3 to 5 years of experience in automation of transport and palletizing systems  
Knowledge in PLC programming
- **Required study**  
Electrical, Electronic or Mechatronic University graduate or Technical Institute bachelor
- **Required competency**  
PLC programming (preferably Siemens TIA Portal) and HMI and Scada programming  
Knowledge in speed regulation and positioning control  
Experience in electrical diagrams design (preferred)
- **Required profile**  
Availability to travel within Europe in order to perform commissioning  
Good knowledge of spoken and written English (knowledge of other languages will be a plus)  
Able to work in a team and good personal relationship).
