

Sales engineer

We are looking for pragmatic engineers to be part of our international team. We develop state of the art equipment and solutions for automation of transport and storage systems. Together with our other offices in the Netherlands we come to the best solution for every unique warehouse!

Function

- Lead finding and contact with customers.
- Pick the customer requirements and evaluate customer needs.
- Conceive and design an automated solution.
- Prepare the budget and the offer.
- Present and defend the offer.
- Follow-up the customer.

Requirements

- **Required years of experience**
2 to 4 years of experience in a similar function.
- **Required study**
Mechanical, Electrical or Mechatronic University graduate or Technical Institute bachelor.
- **Required competency**
Good knowledge in designing in Autocad (2D and 3D)
Good knowledge in using Office tools, namely Word, Excel and Powerpoint.
- **Required profile**
Availability to travel within Europe.
Good knowledge of spoken and written English (knowledge of other languages will be a plus)
Able to work in a team and good personal relationship.
